Dr. Nason’s passion for dentistry lies in changing lives for the better. She has practiced her entire 16-year career in northeast Tarrant County. Dr. Nason opened a new state-of-the-art facility in Keller in February 2005. “It’s been a great feeling of accomplishment,” she said. “I bought land, designed the building myself, and built it from the ground up. I also started this practice from scratch—I didn’t merge an existing practice into it. I started with one employee and we now have seven. I love learning the latest techniques in dentistry through continuing education and am amazed at how much the profession has developed and improved in the past 16 years.”

Dr. Nason is passionate about giving—either through philanthropic dental treatments or running for charities. She has completed over 10 marathons and half marathons —most for Leukemia and Lymphoma Society in which she has raised thousands of dollars—and is currently training for the New York City

marathon in November. Since 1995, Dr. Nason has provided charitable dental treatments to children and adults, ranging from basic dentistry to total smile makeovers. “I have also traveled to Mexico with Air Transport Arm of Christ, providing services to some individuals that have never even seen a dentist before,” Dr. Nason said.

“Although I am humbled that so many people have trusted my team and me to provide them with their dental care, it is the sharing of their lives that I am most grateful for,” she said.
